topic

Broad subject area.

Tag	Count in all-post sheet	Plain-English meaning
topic:immigration	9,196 (91.9%)	Post is about immigration / immigration enforcement / immigration policy. Applied to every tweet from a tracked-tier account (core / government / officials) unless an obvious non-immigration signal blocks it. The corpus is overwhelmingly about immigration; making this the default beats trying to infer it from sparse text. Confidence split: emitted with `tentative: true` when the tweet's text carries no explicit immigration-domain signal (no origin/country pattern, no enforcement verb, no ICE/CBP/DHS handle, no border keyword, etc.). These are the image-heavy / template-light tweets where the author's identity is the only reason we're confident. Confirmed (tentative omitted) when at least one explicit signal fires.
topic:economy	1,083 (10.8%)	Jobs, wages, workers, labor markets, business, taxes, prices, trade, supply chains, or economy. Also emitted when a narrower always-economic tag fires.
topic:general	971 (9.7%)	Broad or mixed-problem posts that are not a narrower topic.
topic:military	658 (6.6%)	Military, armed forces, veterans, service members, troops, deployments, the Pentagon / DoD, combatant commands, carrier strike groups, service academies, or combat.
topic:laudatory	99 (1.0%)	Lists or celebrates accomplishments, wins, or successes.
